Due: February 4, 2014
SECTION 1.0  
GENERAL INFORMATION AND SCOPE OF WORK

This Request for Proposal (RFP) has been posted on the GSA Procurement website for your convenience. Addenda and attachments, if issued, are also posted. It is the Offeror’s responsibility to ensure that the entire RFP package, in its latest version, is reviewed prior to submittal of a proposal.

1.1  Introduction/Purpose

Ventura County Medical Center (hereinafter referred to as the “Ventura County”) is seeking a qualified Vendor (hereinafter referred to as “the Vendor”) to provide, install, and maintain the Surgical Booms, Lights, and Flat Panel Display Support Arms (hereinafter referred to as the “Systems”) for a 122-bed Hospital Replacement Wing (HRW) to be constructed on the Medical Center campus in Ventura, California.

The successful Vendor shall furnish all engineering, site specific shop drawings, equipment, delivery, project management, coordination, assembly and installation, configuration, testing, certification, training, documentation, and other miscellaneous materials and labor as necessary for a complete turnkey installation of the Systems. Above-ceiling structural support will be furnished and installed by the Design-Build team based on final site-specific shop drawings provided by the vendor. Vendor provided mounting plates and other proprietary rough-in materials will be installed by the Design-Build Team in accordance with the site specific shop drawings. Any materials or labor not specified here that are necessary for a complete certified turn-key installation of the systems shall be deemed a part of the vendor’s scope of work.

Alternates for optional components, and on-going service/preventive maintenance agreements are included in this RFP.

The Vendor shall be responsible for participating with Ventura County and the Design-Build Team in coordinating completion of construction documents, and in planning and coordinating installation of the Systems.

Vendors are invited and encouraged to submit multiple responses to this request for proposal if their product lines offer multiple solutions to the operational criteria set forth herein.
SECTION 1.0
GENERAL INFORMATION AND SCOPE OF WORK

Other systems that are not part of this work - and will be bid separately - include 1) Imaging/Image Guided Systems, 2) Surgical and Exam Tables, 3) Integrated Surgical Video Systems, 4) Exam Lights required for other areas, and 5) Central Sterile Services Equipment.

Proposals shall be due no later than 3:00 p.m. on February 4, 2014 for the furnishings of Surgical Booms, Lights and Flat Panel Display Support Arms in accordance with the attached Terms and Conditions, and Instructions to Offerors which by this reference are made a part hereof.

Proposals submitted after this date and time will not be accepted.

Offerors shall be skilled and regularly engaged in the general class or type of work called for in the solicitation documents.

1.2 Background

In order to comply with California Senate Bill 1953, Ventura County Medical Center is constructing an OSHPD compliant Hospital Replacement Wing that will support a number of services including Emergency, Imaging, Surgery, Central Sterile Processing, Medical/Surgical/Telemetry Care, ICU, LDR, C-Section, Post-Partum, NICU, PICU, Pharmacy, Main Lobby, Admitting, Education/Conference rooms, and Gift Shop.

The HRW Project (hereinafter referred to as the “project”) will be constructed on the existing Medical Center campus, on a site to be cleared just north of the existing Fainer Building.

In order to expedite the project design, agency review, and construction, Ventura County has engaged the Clark Design-Build Team consisting of architects, MEP engineers, medical technology planners, and numerous other specialty consultants and sub-contractors to plan, design, and build the HRW through completion, OSHPD acceptance, and licensure.

A primary element of the Design-Build strategy is to more closely involve vendors of major systems and equipment in developing the final construction documents that must be submitted to – and approved by - OSHPD before
construction can begin. For this reason, a three-step process will be used for developing medical equipment shop drawings, as follows:

**Step 1** - System vendors for the Surgical Booms, Lights, and Flat Panels Support Arms be chosen early and brought on board to work with the Design-Build Team to complete construction documents. Preliminary vendor shop drawings containing OSHPD seismic tie-down information will be produced and delivered to the Design-Build Team. Vendors will participate in regular coordination meetings with the Design-Build Team during completion of Construction Documents, as detailed later in this Section.

**Step 2** - final shop drawings, incorporating revisions identified during construction document coordination, will be issued by vendors for inclusion by the Design-Build Team in the OSHPD submittal.

**Step 3** - following OSHPD review vendors will incorporate OSHPD review comments and resubmit their shop drawings.

Response to this RFP requires submission of a complete turn-key Base-Bid proposal including all equipment and services as detailed later in this document, plus pricing for optional components that may be used to optimize final configurations within the established project budget.

Vendors will be required to pay prevailing wages.
