| B. AHA 2010 CPR/ECC Guidelines | Dr. Salvucci announced that Sterling Johnson will be conduction the EMS CPR audit and will be coming to individual stations. Please make sure the crews are aware.  
When ART/BART training is completed we will make the rest of changes for 2010 | | |
| C. Policy 717: Intraosseous Infusion | Old and new are included as showing he track changes made the new policy confusing to review.  
Discussion: 1. Should proximal humeral be used as the second insertion option?  
- Feel should start with tibia. Most EMS agency do not use humeral.  
- Feel should use tibia site only. Humeral is not the preferred site.  
- The other problem is training approximately 250 medics and | Tibia IO approved. Second site will be reviewed if problems with first site.  
Lidocaine will be reviewed by AS and he will make a decision.  
EMS is looking at purchasing the initial stock of 2 each of the 3 sizes for all paramedic units (100 units across the county). Hoping to get stock by 6/1 and providers will be responsible for restock. | Approved with changes. |

III. POLICY: The Ventura County Emergency Medical Services Agency (VC EMS) Medical Director shall appoint a Trauma Review Committee (TRC). The trauma care administered to patients of the Ventura County Trauma Care System will be reviewed for appropriateness and patient outcome by the TRC. The TRC is an advisory committee to VC EMS on issues related to trauma care. The TRC will function as a sub-committee within the VC EMS Continuous Quality Improvement (CQI) program.

IV. SCOPE OF AUDIT REVIEW:
The scope of the review to be conducted by the committee will include, but not be limited to, a review of:

A. Trauma deaths, as determined by the VC EMS Medical Director.

I. PURPOSE: To define the “Code Trauma” and “Trauma Call Continuation” process by which patients at a community hospital that emergently require the specialty services of a designated trauma center are transferred.

III. DEFINITIONS:
A. Code Trauma: A process by which a patient with potential life-or-limb threatening traumatic injuries who require an immediate procedure at a designated trauma center and a delay in transfer will result in deterioration of the patient’s condition, and the treating physician requests immediate transport to a designated trauma center.

B. Trauma Call Continuation: A process by which a patient with potential life-or-limb threatening traumatic injuries who has been taken to the emergency department by ALS ambulance requires an immediate procedure at a designated trauma center, the ALS ambulance is still on the premises, and the treating physician requests immediate transport to a designated trauma center.

C. Life-or-limb threatening injuries in need of emergency procedures are patients with at least one of the following:
1. Indications for an immediate neurosurgical procedure.
2. Penetrating gunshot wounds to head or torso.
3. Penetrating or blunt injury with shock.
4. Vascular injuries that cannot be stabilized and are at risk of hemorrhagic shock or loss of limb acutely (excluding fingers/toes).
5. Pregnancy with indications for an immediate Cesarean section secondary to trauma.

IV. POLICY: Responsibilities of each of the trauma system participants are listed below.
A. Community hospitals will:
1. Assemble and maintain a “Code Trauma Pack” in the emergency department to contain all of the following:
   a. Checklist with phone numbers of Ventura County trauma centers.

3. Establish policies and procedures to make personnel available, when needed, to accompany the patient during the transfer to the trauma center. These policies will include patient criteria for requiring healthcare personnel beyond the paramedic scope of practice to accompany a trauma patient in transport.

B. Ventura County Fire Communications Center (FCC) will:
   1. Respond to a “Code Trauma” transfer request by immediately dispatching the closest available ALS ambulance to the requesting hospital.
   2. Consider “Trauma Call Continuation” transfers to be a follow-up to the original incident, and will link the trauma transfer fire incident number to the original 911 fire incident number.

C. Ambulance Companies
   1. Ambulance companies will respond immediately upon request for “Code Trauma” transfer.
   2. For patients who are re-triaged on arrival at a community hospital and are determined by the referring physician to require “Trauma Call Continuation,” ambulance companies will immediately transport the patient to a designated trauma center, with the same ALS personnel and vehicle that originally transported the patient to the community hospital.
   3. Transports performed according to this policy are not to be considered an interfacility transport as it pertains to ambulance contract compliance.

D. Trauma Centers will:
   1. Publish a single phone number, that is answered 24/7, for an individual authorized to accept the transfer of patients who have a condition as described in Section III.B of this policy.
   2. Immediately upon initial notification by a transferring physician, accept in transfer all patients who have a condition as described in Section III.C of this policy.
   3. Immediately post on ReddiNet when there is no capacity to accept trauma patients.
Policy 1407: Emergency Trauma Transfers

Page 3 of 5

V. PROCEDURE:

A. Code Trauma:

1. Upon determination of Code Trauma, and after discussion with the patient, the transferring hospital will:

   a. Determine the most appropriate means for the patient transfer, either paramedic ambulance, critical care transport (CCT), or paramedic ambulance accompanied by healthcare staff from the transferring hospital.

      (1) For patients appropriate for paramedic ambulance transport:

          (a) Immediately call the Ventura County Fire Communication Center at 805-384-1500 for an ambulance.

          (b) Identify their facility to the dispatcher and advise they have a “Code Trauma” transfer and the destination trauma center.

      (2) For patients appropriate for CCT transport (the patient requires accompaniment of healthcare staff beyond paramedic scope of practice):

          (a) Immediately contact the appropriate CCT provider agency, advise they have a “Code Trauma” and are requesting emergency CCT response.

      (3) For patients appropriate for CCT transport and CCT response is delayed:

          (a) Arrange for one or more healthcare staff, as determined by the clinical status of the patient, to accompany the patient to the trauma center.

   e. Contact the trauma center for nurse report at the time of, or immediately after, the ambulance departs.

2. Upon request for “Code Trauma” transfer, the dispatch center will dispatch the closest ALS ambulance and verbalize “MEDxxx Code Trauma from [transferring hospital]”. The trauma center will be denoted in the incident comments, which will display on the mobile data computer (MDC). If a unit does not have an operational MDC, the transferring hospital will advise the responding ambulance personnel of the destination trauma center.
3. Upon notification, the ambulance will respond Code (lights and siren) and the ambulance personnel will notify their ambulance company supervisor of the “Code Trauma” transfer.

4. Ambulance units will remain attached to the incident and FCC will track their dispatch, enroute, on scene, en-route hospital, at hospital, and available times.

2. Upon notification of Trauma Call Continuation, the ambulance personnel will notify FCC of their assignment to a Trauma Call Continuation. FCC will link the trauma transfer to the original 911 incident and continue tracking en-route hospital (departure from community hospital), at hospital (arrival at trauma center) and available times.

3. When the transferring physician determines the patient is ready and directs ambulance personnel to continue the transport, the ambulance will emergently transport the patient to the trauma center. The transporting paramedic will contact the trauma base hospital enroute and provide updated patient information.

C. For all Code Trauma and Trauma Call Continuation transfers, the transferring hospital will submit a completed Emergency Trauma Patient Transfer QI Form to the Ventura County EMS Agency within 72 hours. The transfer will be reviewed for appropriate and timely care and to identify opportunities for improvement. ATTACH COMMUNICATION EQUIPMENT PERFORMANCE EVALUATION FORM

Signatures: BH Medical Director/Paramedic Liaison Physician

Prehospital Care Coordinator
I. PURPOSE: To inform EMS providers of the ICE (In Case of Emergency) program that is promoted for personal cell phones. This is described as a universally-recognized mechanism to provide prompt notification to a family member or other designated contact of an ill or injured patient, and perhaps obtain information about a patient’s medical history.

II. AUTHORITY: Division 2.5 of the Health and Safety Code, Sections 1797.214 and 1798.

III. DEFINITIONS: “ICE” is an acronym for “In Case of Emergency”.

IV. PROCEDURE: It may be practical for EMS Providers to briefly search for a cell phone or other identification when working with a patient that is unable to provide this information. These items could then be provided to law enforcement or transported with the patient to the hospital. EMS providers are not usually the ones who make emergency notifications to family members or other third parties. This is normally done by law enforcement, hospitals or others involved in the situation. Searching for cell phones or making notifications, whether to an ICE contact or other third party, should never delay patient assessment, treatment, or transport. Currently, there are no applicable federal laws that require an EMS provider to check a patient’s cell phone and attempt to make contact with the patient’s ICE designee. If the EMS Provider attempts to make a notification, they should only disclose personal health information about the patient that is directly relevant to their involvement with the patient’s health care. This notification should be documented on the approved Ventura County documentation system.
I. PURPOSE: To define the use of the “EMT-P/MICN BH Communication Record” by approved Ventura County the Base Hospitals.

II. PROCEDURE:

A. This form should be used to document communication between the paramedic and mobile intensive care nurse (MICN). All pertinent areas of the form are to be completed by the MICN to document each patient contact between the paramedic and the MICN.

B. Base Hospital is responsible for providing the forms and ensuring documentation compliance.

C. Base Hospital is responsible for maintenance of records according to hospital data requirements.
