

THE COMMUNITY'S HOSPITAL

Santa Paula Hospital is an acute-care community hospital providing quality, compassionate hospital care to all Santa Clara Valley residents. The hospital is a 49-bed medical facility with 19 private rooms. All the rooms feature picturesque views of the nearby mountains, trees or the city.

The hospital belongs to the community, with many of the staff living in the Santa Clara Valley. This creates a caring connection between the patients and the highly trained medical staff.

Along with the only emergency room between Ventura and Santa Clarita, Santa Paula Hospital has state-of-the-art equipment, a comprehensive roster of services and dedicated ICU, maternity and medical/surgical units. The hospital is also associated with UCLA Medical Center, so patients have the benefit of the latest research and clinical trials.

As a smaller hospital, Santa Paula has a staff that gives each patient highly individualized care, and procedures can be scheduled quickly and efficiently.

Santa Paula Hospital is accredited by the Joint Commission on Accreditation of Healthcare Organizations, a prestigious designation that requires the hospital meet rigorous patient safety and quality standards.

THE VENTURA COUNTY HEALTH CARE AGENCY

Santa Paula Hospital is part of the Ventura County Medical Center campus, both of which are under the umbrella of the Ventura County Health Care Agency (HCA). HCA is primarily responsible for providing health care services to Ventura County residents. It provides public services through the county's health officer and Emergency Medical Services, and a wide range of additional medical and health-related services, such as education, prevention and treatment. Services are for all county residents, regardless of their economic situation.
