- This is an educational facility so appointments may take 2-3 hours and patients may be required to return for multiple appointments to complete treatment.
- Patients will be asked to pre-pay in order to be appointed after screening. Following appointment, patients may reschedule a maximum of three times before services are discontinued without a refund. At least 24 hours notice is expected for rescheduling.
- Patients who have recently had dental x-rays taken elsewhere will be asked to provide a copy before treatment in order to minimize the exposure to radiation.
- Copies of x-rays taken at the Oxnard College Dental Clinic are available at an additional fee for patient's to take.
- A patient's "build-up" and periodontal status determines the type of cleaning needed.
- Only specific dental hygiene procedures are available—no fillings, crowns, extractions, or any other dental work.
- All dental hygiene procedures are supervised by licensed dentists and dental hygienists.
