

Construction Activity Update

Week of: April 8, 2024

Current Activity

As weather permits, Calleguas' contractor, Kiewit, will perform work at the following locations:

- Southeast corner of Kanan Rd and Lindero Canyon Rd intersection: **Monday (04/08) through Friday (04/12) between the hours of 7 a.m. to 4 p.m.** Work will include construction activities at the TWSD Meter Station site. To perform this work safely, set-up and take-down of daily traffic control may be necessary. Please follow posted traffic signs and plan for extra travel time to your destination.
- South of Bowfield St and Lindero Canyon Rd intersection: **Monday (04/08) through Friday (04/12) between the hours of 5 a.m. to 7 p.m.** Work will include pipeline construction and trench dewatering activities where shallow groundwater was previously encountered. To perform this work safely, concrete K-rail barriers and associated traffic control will remain in place in both the northbound and southbound directions of Lindero Canyon Road at and near the Bowfield St intersection.
- Pump Station/Pressure Reducing Station (PS/PRS) site located at 10 Lindero Canyon Rd: **Monday (04/08) through Friday (04/12) between the hours of 7a.m. to 5 p.m.** Work will include construction activities at the site and within the underground PS/PRS.

Please note, construction is dependent on many variables, including, but not limited to weather conditions, and this information is subject to change.

Upcoming Activity

Please visit the City of Thousand Oaks' website for more information regarding its 2024 Street Resurfacing Program including along Lindero Canyon Road. [City of Thousand Oaks 2024 Street Resurfacing Program](#)

Project Background

Calleguas Municipal Water District (Calleguas) and Las Virgenes Municipal Water District (LVMWD) each own and operate potable water systems largely dependent on imported water supply. Both agencies are subject to planned and unplanned interruptions of water deliveries that can negatively impact their ability to deliver potable water to their respective customers. Calleguas and LVMWD are constructing an interconnection to improve the future reliability of both systems.

Calleguas will construct a new Pump Station/Pressure Regulating Station (PS/PRS) located along Lindero Canyon Rd just north of the Ventura County/Los Angeles County line. Additionally, Calleguas will construct the North Interconnection Pipeline segment along Lindero Canyon Rd between the PS/PRS and Kanan Rd, and other related facilities. Construction activities overseen by LVMWD, primarily south of the Los Angeles County line, has concluded.

Project Objectives

- Improve the reliability and flexibility of your water storage and distribution systems.
- Improve the ability to provide potable water to you during periods of reduced imported water supply.
- Reduce the risk for potential water shortages associated with natural disasters, such as wildfire and earthquake, and required system maintenance.

Enhancing regional water supply reliability in an economically and environmentally responsible manner.
