

Flexible Spending Accounts and Transportation Benefit Reimbursement Accounts

ADMINISTRATION CHANGES AHEAD

INTRODUCING CHARD SNYDER...

Started in 1988, Chard Snyder is a national employee benefit solutions administrator. We have partnered with Chard Snyder to offer you opportunities that empower you to spend, save, and manage the money you work so hard for, in more productive and valuable ways.

Chard Snyder partners with best-in-class technology providers to equip their participants with smart, intuitive tools for account management. Their easy-to-navigate online services provide the data you need, when you need it, in real time. The technology includes:

- *Participant Portal* – quick & easy navigation with secure access for complete account management.
- *Multi-purse Benefit Card* – an easy way for you to directly access the money in your Dependent Care FSA, Health Care FSA and Transportation Benefit Reimbursement Accounts. It works like a debit card but because of smart technology, funds can only be used for expenses that are eligible under the specific plan.
- *Mobile App* – allows you to manage your accounts via your mobile device, check balances and transactions, file a claim, make a payment, capture a receipt, and contact customer service. The app has Touch ID.

You have *Flexible Payment Options* to choose from:

- Chard Snyder Benefit Card
- Participant-initiated payment on participant portal
- Claims exchange with auto-pay or expense tracker

You can receive your *Communications* from Chard Snyder via:

- Email
- Text
- Mail
- Participant portal

Chard Snyder will be taking over the administration of the FSAs and Transportation Reimbursement Benefit Accounts effective January 1, 2019. In addition to a packet of information that you'll be receiving in the mail from Chard Snyder, you can hear more about these exciting changes from a Chard Snyder representative at any of the three Open Enrollment informational meetings and the Health & Wealth Fair (see side panel for more information on these events).
