Director

GENERAL SERVICES AGENCY

County Government Center
Administration Building
800 South Victoria Avenue
Ventura, CA 93009
(805) 654-3800

May 28, 1997

Revised June 10, 1997

TO: Lin Koester, Chief Administrative Office, L#1940

FROM: Peter S. Pedroff, Director, L#1000

A handwritten signature in black ink that reads "PETE".

SUBJECT: 1996-97 GRAND JURY RECOMMENDATIONS

The Grand Jury included General Services Agency (GSA) in requesting responses for recommendations made to the Area Agency on Aging (AAA) and the Resource Management Agency (RMA) concerning the suitability and/or condition of certain facilities. The following information is provided in response to those recommendations.

AREA AGENCY ON AGING

Recommendation: That an effort to bring about this office expansion be vigorously pursued by the Board of Supervisors through grants or whatever means necessary to fulfill this need of the AAA.

Response: AGREE- The Area Agency on Aging office will be moved into the Civil Service Commission building.

RESOURCE MANAGEMENT AGENCY

Recommendation: The leaking roof at the El Rio Facility meter testing laboratory should be repaired to provide a safe working environment for the inspector and to protect the equipment housed in the lab. The better solution would be to have larger and more adequate facilities provided by GSA for the safety of the inspectors and the protection of the costly equipment maintained by Weights and Measures.

Response: AGREE- GSA is not, however, the responsible agency in the matter. There are two buildings occupied by RMA at the El Rio Facility with leaky roofs. The laboratory building roof was fixed in December 1996 under our roof replacement program. The other building was not fixed because it is due to be demolished. The Facilities Use Committee is looking for alternate space to accommodate the RMA operations currently using this building.

Please contact me at 654-3800 if you need more information.
