**County of Ventura
Request for Proposals #5737
Creating, Fabricating and Installing a Interactive Children's
Exhibit on Air Quality
QUESTION AND ANSWER #1**

February 28, 2014

1. Question: How detailed does the financial statement need to be?

Answer: **County of Venture requires the Profit & Loss Statement.**

2. Question: Does our fabrication subcontractor need to provide financial statements?

Answer: **No, the subcontractor does not need to provide financial statement.**

3. Question: Item e. References. Museum projects often take many years to complete. Can we provide reference for projects completed in the last 5-6 years?

Answer: **Yes, reference for projects completed in the last 5-6 is acceptable.**

4. Question: Do you have floor plan for the exhibit space? Locations of doors, openings, windows, ceiling lighting and electrical outlets?

Answer: **Floor plans attached. Please focus on the "Minerals" room between "Storage" and "Fossils." The room's dimensions are exactly 10' X 16' with a ceiling of 9'. There are some 40" deep cabinets on the "Fossil" end which can be removed. The 2 doorways are standard 29" wide and 79" tall. The door on the "Fossil" end is 27" in from the inside wall (the wall with the "Climbing Wall" on the opposing side.)**

Current ceiling lighting is 1 track lighting unit with 3 fixtures.

There are at least 2-3 outlets in the room. (Difficult to determine without moving heavy current cabinets in room.)

No windows.

The walls and ceiling will be patched and painted.

5. Question: Exhibit Fabrication. What is the color and material of the basic matt flooring?

Answer: **Flooring in space currently beige carpet. Surrounding flooring is industrial grey flooring with raised squares (Like Burke Endura Flooring in "square.")**

6. Question: Is there a deadline for the completion of the project?

Answer: **As stated on Page Nine (9) – Project Delivery Requirements, the APCD is hoping to complete the project by fall 2014 (October 1). However, if there is ample justification for an extension, it would be considered**

7. Question: The actual space at the museum allocated for the exhibit is at present a storage space filled with stuff. One wall is the exterior wall, on which the paint is peeling, the other three walls are basically temporary divider walls (two have doors). My question is: Will the Gull Wings Museum take down the temporary walls, clean out the space and prep and paint the solid exterior wall?

Answer: **The space is actually the "Minerals" Room next to the Storage space – which is an actual room. Yes, the Museum, will clean, prep and paint the room.**

8. Question: Are there any elevations for the room the exhibit will be going into?

Answer: **Please refer to Exhibit C.**

9. Question: If there are no elevations, can I get an accurate height measurement of the concrete exterior wall (and also a confirmation of the material it is made of), the height of the windows about it, and the total height to the ceiling?

Answer: **Actual space has no windows and the ceiling is 9' high. Walls are not concrete (probably drywall/wood).**
