Discussion

Many items are not subject to price updates, such as charges for items received without cost to County under certain programs such as children immunizations, and pass-through items such as Reference Laboratory and Blood Product services where pricing for services is governed by a regulation or statute. Most Pharmaceutical items have iterative pricing determined by acquisition cost updated in real-time, and items acquired under the 340b federal drug discount program where pricing is determined by another regulatory agency such as the Centers for Medicare and Medicaid Services. Compliance with the terms of participation and associated billing regulations are given the highest priority. Pricing for many items presented for consideration were devised utilizing comparative data from other peer hospitals, allowing for market-based pricing and optimization with managed care contractual provisions. Certain prices were increased; others have no proposed increase, and many were reduced relative to market pricing and cost for services. The overall impact is anticipated to provide an increase of less than one percent (1%) in the average charge since our last price change on October 1, 2022. This CDM contains a list of such changes. You can find our current CDM online at any time by going to: https://apps.para-hcfs.com/PTT/FinalLinks/Ventura_V3.aspx#.
