CORONAVIRUS/COVID-19 GUIDANCE FOR RE-OPENING & OPERATING ALL NON-RESIDENTIAL SWIMMING POOLS

BACKGROUND

COVID-19, the disease caused by the novel coronavirus, SARS-CoV-2, is a respiratory illness that is spread through the air via respiratory droplets from an infected person or by touching contaminated surfaces. It is not likely spread through properly maintained and disinfected pool water. Symptoms of the virus include fever, cough, and/or shortness of breath.

The below checklist describes the steps that owners and operators of public swimming pools in non-residential settings (aquatic centers, community pools, fitness club pools, hotel/motel pools, country club pools, school pools, and swim club pools) must take to help prevent the spread of COVID-19 by focusing on social distancing, sanitation, communication, and workplace practices.

Please note: This document may be updated as additional information and resources become available. Please visit our <u>website</u> or <u>www.vcemergency.com</u> regularly for any updated changes to this document and for all other COVID-19 updates in Ventura County.

All pool facilities covered by this guidance must implement all applicable measures listed below and be prepared to explain why any measure that is not implemented is not applicable to the facility. All indoor pools remain closed at this time except for drowning prevention classes.

For information regarding athletic events, please see our guidance on aquatic sports.

Social Distancing Protocol for Public Swimming Pools in Non-Residential Settings

Facility Name: Facility Address:			
		Facilities shall implement all measures listed below and explain why any measure that is not implemented is not applicable to that facility.	
Mea	Measures to Ensure Social Distancing		
	On-duty employee is designated to monitor and enforce compliance with the Social Distancing Protocol. Lifeguards who are actively guarding are not also expected to monitor handwashing, use of face coverings, or social distancing of others. See "Measures to Protect Employee Health" below.		
	Implement a monitored appointment/reservation system to limit use of the pool facility to a small number of individuals or household groups at a time. The system should encourage members of the same household to use the facility at the same time and should ensure that household members always maintain 6 feet apart from members of other households. Describe the appointment/reservation system:		
	Tables, chairs, and loungers placed at least 6 feet apart, and any furniture that cannot be properly distanced is stored/secured in a manner to prevent use.		
	Gathering outside of the pool (such as on the pool deck) is prohibited, except that members of a household may observe a child or other person swimming to ensure safety and supervision. Pool area use is limited to physical/therapeutic activities only.		
	Barriers installed where feasible and where patrons and staff interact and cannot adequately maintain physical distance.		
	Aquatic fitness classes and swim lessons are limited to one instructor per ten attendees, provided 6-foot distancing can be maintained. Lessons that require physical contact between the instructor and student are not allowed. An exception is for drowning prevention classes. See the CDPH COVID-19 guidance document for day camps.		
	Lap swimming is limited to two swimmers per lane.		
	Physical cues or guides (e.g., lane lines in the water or chairs and tables on the deck) and visual cues (e.g., tape on the decks, floors, or sidewalks) and signs are provided to ensure that staff, visitors, and swimmers stay at least six feet apart from one another, both in and out of the water.		
Disir	nfection Protocol, Requirements, and Oversight		
	Conduct a pool safety check to ensure pool chemistry is adequate for disinfection, and the pool has been evaluated for safety equipment (rescue pole with body hook and life ring). □ Proper operation and maintenance should inactivate the novel coronavirus in the water.		

An <u>EPA-approved disinfectant</u> is frequently used to disinfect all handles/doorknobs, latches, pool/spa handrails, pool grab rails, ADA lifts, light switches, faucets, dispensers, tables, chairs, and countertops on the following schedule:
Gate handles, doorknobs, & fob readers:
Ensure facility has adequate shared equipment for patrons, such as kickboards, pool noodles, float toys, water dumbbells, etc. to minimize sharing whenever possible. Limit use of the equipment to one patron at a time and disinfect the items after each use. Individuals should bring their own towels to the pool and not share with individuals from other households.
Water slides are prohibited.
No food or beverages can be distributed on pool decks with others, and household members cannot share any food or beverages with non-household members.
Person(s) has been designated to develop, implement, and enforce the sanitation/disinfection protocol for the pool facility.
Person has been designated to be responsible for monitoring restroom and changing facilities to ensure the facilities are fully stocked with toilet paper, soap, paper towels, and running water.
Frequency of stocking, cleaning, and disinfecting the restrooms and changing facilities increased based on the volume of the pool and pool use. Restrooms and changing facilities are stocked, cleaned, and disinfected on the following schedule:
□ Restrooms: □ Changing facilities: □ Other:
Restrooms and showers are frequently disinfected, and restroom ventilation systems are operating properly.
Sanitizing/disinfection wipes provided for pool users to disinfect high-contact touchpoints before and after use.
For those facilities that lack on-site restrooms for hand washing, hand sanitizer is provided at the following location
Ventilation systems of indoor spaces shall operate properly.

	Increase introduction of outdoor air as much as possible by opening windows and doors, using fans, or other methods. Do not open windows and doors if doing so poses a safety risk to the public, staff, residents, or swimmers.
Mea	sures that Communicate to the Public
	Signage shall be posted at each entrance into the facility informing all employees and pool users that they should: Avoid entering the facility if they have symptoms consistent with COVID-19; Maintain a minimum 6-foot distance from one another; Wash their hands frequently or use hand sanitizer upon entering into the facility; and Not shake hands or engage in any unnecessary physical contact.
	Signage indicating the maximum number of people allowed into the pool area at any one time.
	Spa signage indicating whether the spa isclosed orlimited to one household at a time.
	A copy of this protocol is posted at all entrances into the facility.
Mea	sures to Protect Employee Health
	Employees who can carry out their work duties from home have been directed to do so.
	All employees have been told not to come to work sick.
	Symptom checks are being conducted before the employee enters the workspace. Symptoms include, but are not limited to, a cough, shortness of breath, fever, or others. Temperature checks should be conducted if feasible.
	All workstations are separated by at least 6 feet.
	Employees are allowed frequent breaks to wash their hands.
	Soap & water are available to employees at the following location(s):
	Hand sanitizer is available to employees at the following location(s):
	Disinfectant and related supplies are available to employees at the following location(s):
	Lifeguards who are actively guarding are not also expected to monitor handwashing, use of face coverings, or social distancing of others. Designate another employee to monitor implementation of social distancing protocols. All employees should know who this person is and how to contact that person.

E-mail:		
Name	: Phone Number:	
You m	ay contact the following person with any questions or comments about this protocol:	
*Any additional measures not included here should be listed on separate pages, which the facility shall attach to this document.		
	Use of drinking fountains is prohibited. Users are encouraged to bring their own water in a non-glass container.	
	Use of spray grounds/splash pads or water features is prohibited.	
Gener	al Restrictions	
	Measures are instituted to assure access to services for patrons who have mobility limitations and/or are at high risk in public spaces.	
	Services that are critical to residents/patrons have been prioritized.	
Meası	ures that Ensure Equitable Access to Critical Services	
	Optional – Describe other measures:	
	All policies described in this checklist, other than those related to terms of employment, are applied to staff of delivery and any other companies who may be on the premises as third parties.	
	Upon being informed that one or more employees test positive for, or has symptoms consistent with COVID-19, the employer has a plan or protocol in place to have the case(s) isolate themselves at home and require the immediate self-quarantine of all employees that had a workplace exposure to the case(s). The employer's plan should consider a protocol for all for all quarantined employees to have access to or be tested for COVID-19 in order to determine whether there have been additional workplace exposures, which may require additional COVID-19 control measures.	
	Copies of this protocol have been distributed to all employees.	
	Employees are prohibited from eating or drinking anywhere inside the workplace other than designated break rooms to assure that face coverings are worn consistently and correctly.	
	Breaks are staggered to ensure that six (6) feet between employees can be maintained in break rooms at all times.	
	Shifts are staggered or rotated to limit the number of employees present at the facility at the same time.
